

# Mercadox (MRX) – Whitepaper

## Introduction

Mercadox (MRX) is a decentralized ERC-20 token designed to revolutionize the way buyers and sellers interact across global e-commerce platforms. MRX enables fast, secure, and borderless transactions between users, making it an ideal payment solution for international marketplaces such as Amazon, Alibaba, and regional digital shops worldwide.

## Vision

To become the universal digital currency for e-commerce, enabling any buyer or seller, regardless of location, to transact freely and efficiently without reliance on centralized payment gateways.

## Mission

Our mission is to remove friction in online commerce by offering a stable, fast, and decentralized token that bridges the gap between global marketplaces and consumers.

## Key Features

- Blockchain: Ethereum (ERC-20)
- Token Name: Mercadox
- Symbol: MRX
- Total Supply: 10,000,000 MRX (fixed, no inflation)
- Ownership: Transparent, decentralized smart contract
- Interoperability: Easily integrated into e-commerce platforms via Web3 and payment APIs
- Availability: Listed on Uniswap (initial DEX offering), with future listing plans on centralized exchanges (CEX)

## Tokenomics

Category | Allocation | Description

-----|-----|-----

Public Sale | 40% | Available to the open market

Team & Development | 20% | Locked with vesting for long-term sustainability

Marketing & Partnerships | 15% | For growth, integrations, and global outreach

Ecosystem Rewards | 15% | For incentivizing early adopters and users

Reserve | 10% | For future use or emergencies

## Use Cases

- Seamless payments in online stores worldwide
- Merchant integrations via plugins and APIs
- Buyer protection through smart contract escrow (future roadmap)
- Fast cross-border payments without banks

## Roadmap (Short Version)

Phase 1:

- Token creation on Ethereum
- Listing on Uniswap
- Launch official website and community channels

Phase 2:

- Develop plugins for WooCommerce, Shopify, Magento
- Establish partnerships with global merchants
- Begin centralized exchange listings

Phase 3:

- Launch MRX wallet & merchant payment gateway
- Roll out multi-chain support (Polygon, BSC)
- Implement decentralized buyer protection system
